Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance: The claims are allowable because prior art fails to teach that the cutting tool is mounted on the first side and the motor is mounted on the second side, in combination with other limitations set forth in claim 6.

Regarding claim 6, Gass et al. (2002/0020265), hereinafter Gass, teaches a table saw 1181 including a motor driving a movable cutting tool 40 for cutting workpieces in a cutting region. Gass also teaches a detection system 26 adapted to detect one or more dangerous conditions. Gass also teaches a reaction system 24 associated with the detection system and the cutting tool 40 wherein the reaction system 24 is configured to retract the cutting tool at least partially away from the cutting region. Gass also teaches that the tool upon detection of at least one of one or more conditions by the detection system. See Figs. 5-15 and paragraphs 55-75 in Gass. Gass does not explicitly disclose that the cutting tool retracts independently of the motor and the motor is disengaged from the cutting tool. However, the use of the cutting tool that is retracted independently from the motor is well known in the art such as taught by Spychalla (2,674,130). Spachalla teaches a table saw including a motor 8 driving a movable cutting tool 39, 101. Spachalla also teaches that the cutting tool retracts partially away from the cutting region by an arm 99 independently of the motor. It should be noted that the when the arm 99 is retracted the tension in the belt 110', 110" is diminished, and consequently the cutting tool will not rotate. It should be noted that lowering and lifting of the arm 99 is performed with a help of a screw bolt and a nut. However, this action could take place by an actuator such as taught by as taught by Gass. See Figs. 1-12 and col. 4, lines 26-75 and col. 5,

lines 1-23 in Spychalla. Gass also teaches a turnion 12 that carries the motor and the cutting tool. See Fig. 5 in Gass. However, neither Gass nor Spychalla teaches that the cutting tool is mounted on the first side and the motor is mounted on the second side, as set forth in claim 6. See second paragraph of page 11 of the decision by the Board of Patent Appeals and Interference mailed on 06/01/09.

None of these references by themselves or in combination with the other prior art cited teach the claimed invention set forth in claim 6.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
